## EFOMP Committee Secretary Positions-Open call

Dear NMO Presidents and Delegates, Committee Members,

EFOMP has six advisory committees which function under the EFOMP executive committee. All our committee meetings are held online and the role of the secretary is to document the work of the committee by keeping minutes and submitting a copy to the Officers (by uploading them in the committee google drive folder), when these have been approved by the committee. The secretary also assists the Chair of the committee in any tasks related to the work of the committee. The role is generally held for a period of 3 years with an option to renew after 3 years.

We currently have two vacancies for secretary positions in our **Projects Committee** and our **Communications & Publications**.

Please find below the structure and membership of both committees.

[Communications & Publications committee](#)

[Projects committee](#)

As you know, EFOMP is deeply committed to engaging and empowering the younger generation of medical physicists as we believe that early career colleagues bring fresh perspectives, ideas, and energy that can help shape the future of the federation—which is also their future. To this end, EFOMP warmly encourages NMOs to nominate younger professionals to take on active roles within its structures. We would be delighted to welcome early career colleagues for these positions.

Therefore, we are asking committee members and NMO Boards to consider this opportunity and to send any nominations to the Secretary General by **Friday 19th of September**.

A short CV (max 3 pages in PDF form) and letter of intent from the candidate is required.

If you are currently a member of any of our committees you are eligible to apply for this position.

The appointment to the secretary role will be made by the members of the relevant committee.

Best Regards

Efi Koutsouveli  
President EFOMP

Brenda Byrne  
Secretary General EFOMP
